

OSHA

New Silica Dust Standard

Competent Person Training for Occupational Exposure to Silica

Course Overview

Does your company drill or cut concrete, brick, tile, stone or other Silica-containing material? Many contractors are required to perform these tasks which can cause exposure to respirable crystalline silica dust.

OSHA has passed new silica regulations which require very specific actions for training, equipment modification, written program development, and more.

Participants will receive a certificate and memory stick which includes specific resources to assist your organization with compliance in the new silica standards.

Course Topics

- Understanding Where Silica Exposures are likely to occur
- Health Hazards of Silica Exposure
- Principles of Exposure Evaluation and Method Use
- OSHA Regulations
- Use of Tables
- Exposure Assessments
- Respiratory Protection
- The Role of the Competent Person
- Establishing Medical Monitoring Programs
- Control Methods to Reduce Exposure...and much more

Instructor

Steve High is a Certified Industrial Hygienist (CIH) and Certified Safety Professional (CSP) who holds a Masters in Public Health from John Hopkins and a Masters in Safety Science from Indiana University of Pennsylvania with 30 years experience.
